Why acoustics matter ?

BETTER SOUND
SHAPES
BETTER SPACES
AND BETTER
EXPERIENCES.

True comfort cannot be heard...

66%

People can lose up to 66% of speech intelligibility in noisy environments.

Good acoustics can improve concentration and productivity.

+15%

-STRESS

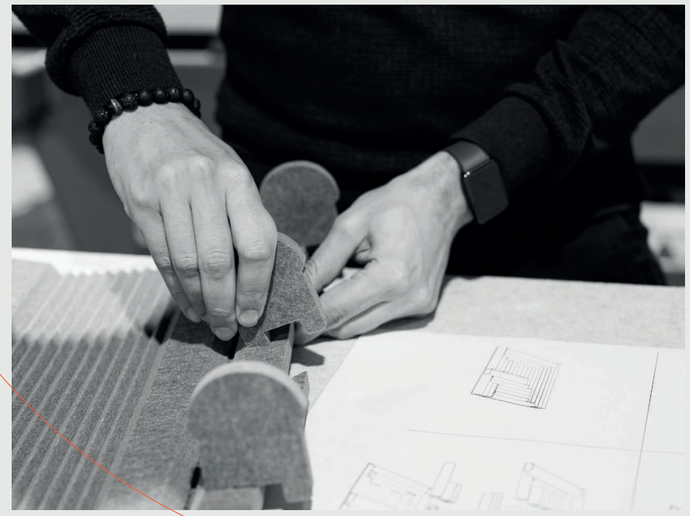

Effective acoustic treatment helps reduce stress and enhances wellbeing.

Better sound quality supports learning, collaboration and privacy.

BETTER TOGETHER

Since 2006

For 20 years, we've been shaping acoustics to better reveal spaces. Arteck is a family business, guided by attention to detail and mastery at every stage - a commitment passed down and built over time.

Our difference

Our design office & our manufacturing facility are under the same roof.

Here, ideas never remain theoretical.
They take shape, are tested, and evolve through real-world experience.
Design and manufacturing move forward in constant dialogue.

That proximity makes us creative, precise — and responsive. From sewing and cutting to custom finishes, every stage happens in-house at our Lyon headquarters.

Where design meets acoustics.

WE BELIEVE ACOUSTICS SHOULD BE PART OF THE ARCHITECTURE FROM THE VERY FIRST LINE.

Our in-house design team combines **Florent's approach to design** with **Wilfried's acoustic expertise**, supporting architects from concept to solution.

Together, they shape solutions that are not simply added to a space, but become part of it.

Designed. Tested. Refined.

Close to every project

A TRUSTED PARTNER FOR INTERNATIONAL PROJECTS, DELIVERING ACOUSTIC SOLUTIONS WITH CONSISTENT QUALITY & LOCAL ADAPTATION.

We don’t just deliver acoustic panels.
We support projects from start to finish.

Your project,
anywhere in the world.

100%

MANAGED BY A DEDICATED POINT OF CONTACT

IN 2008, WE MADE A CHOICE: RPET — A RECYCLED MATERIAL, THEN LARGELY OVERLOOKED. WHAT BEGAN AS AN INTUITION IS NOW AN INDUSTRIAL REALITY, COMBINING ACOUSTIC PERFORMANCE, DESIGN FREEDOM AND ENVIRONMENTAL RESPONSIBILITY.

Designing the future is a conscient choice.

Compliant with European standards
Tested by independent French laboratories.

Compliant with acoustic standard *NF EN ISO 354*
up to 1 aw

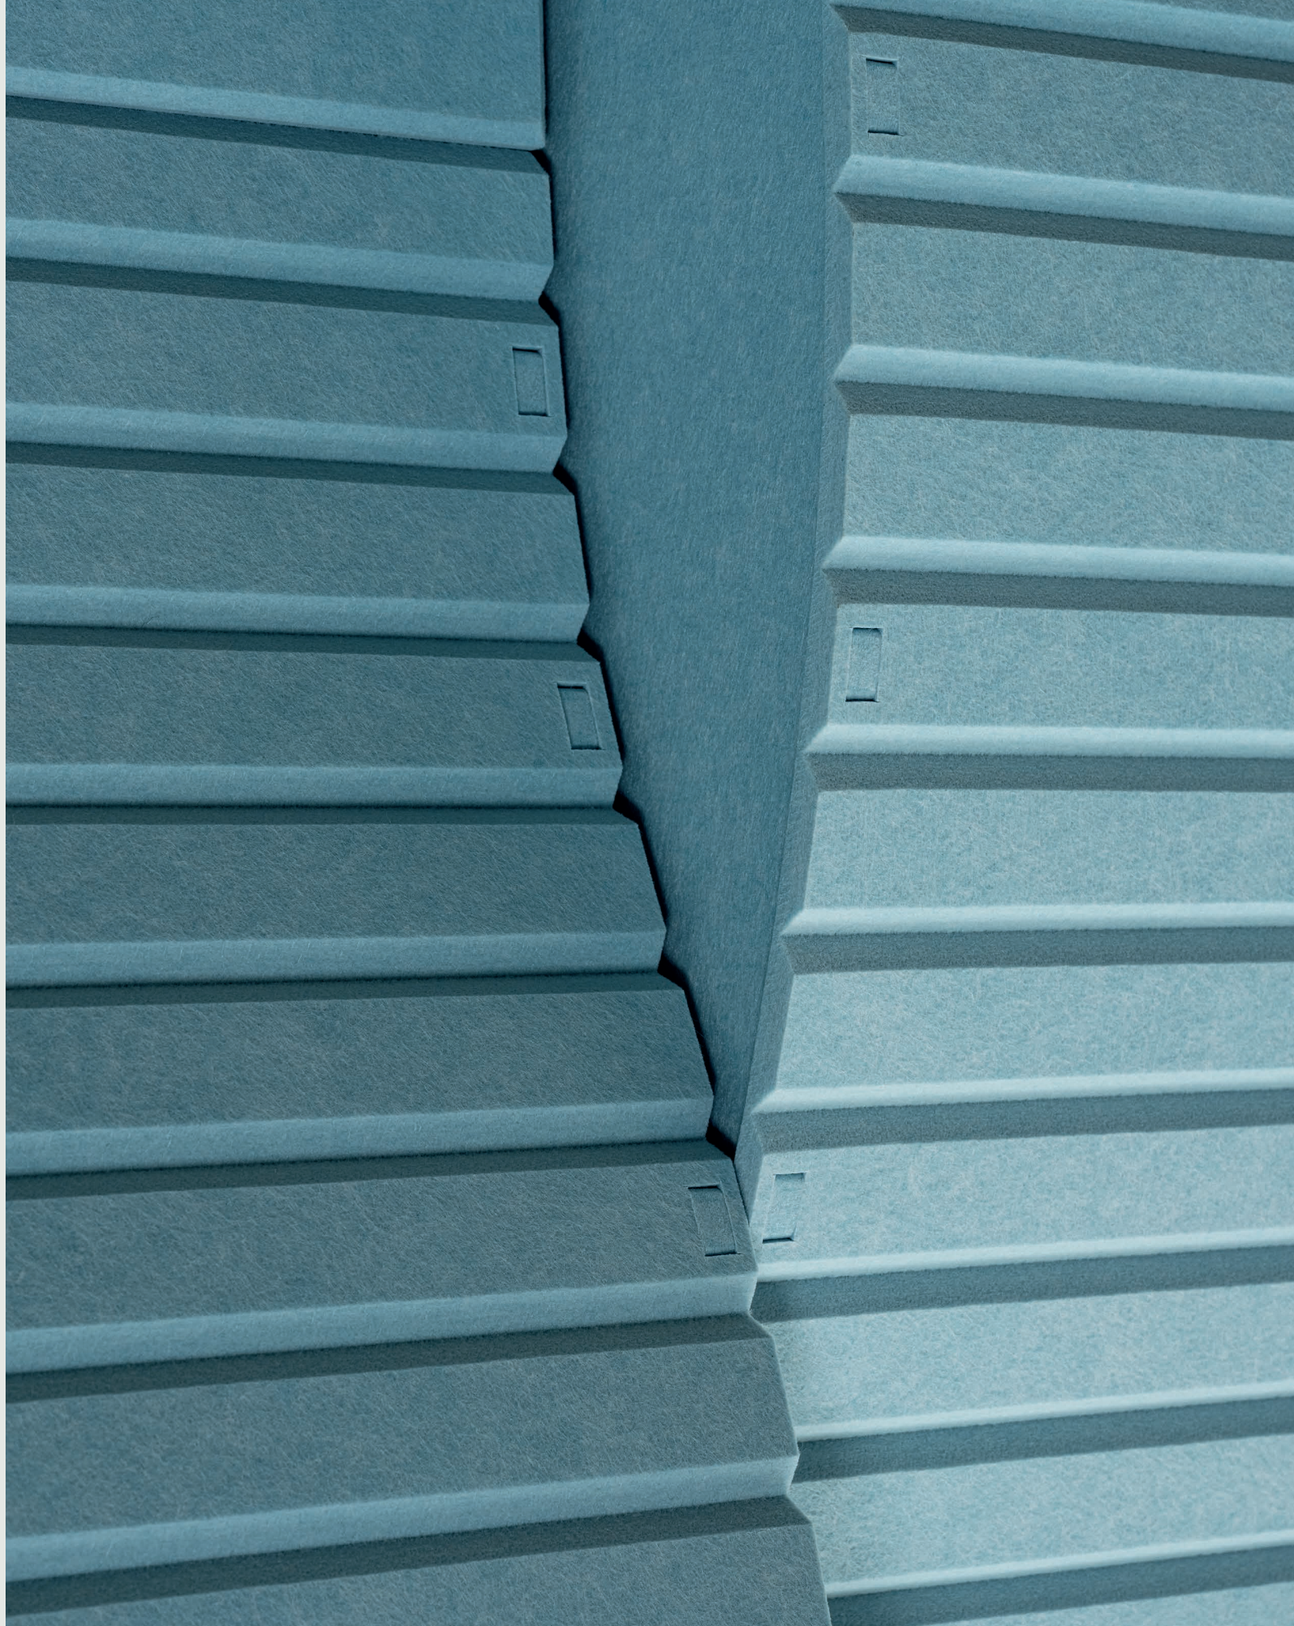

Compliant with fire standard
EUROCLASSE NF EN 13 501 / B-S2, d0 or M1
Compatible with public-access buildings

Moisture and chlorine resistance
(compliant with class C & D - NF EN 13964)
Swimming pools, clean rooms, schools, etc

Impact resistance
(compliant with standard NF EN 13964 - DIN 18032-3)
Gymnasiums, sports halls, etc

UV resistance
(compliant with standard ISO4892-3)
No discolouration

Light reflection coefficient
Optimises lighting and reduces consumption

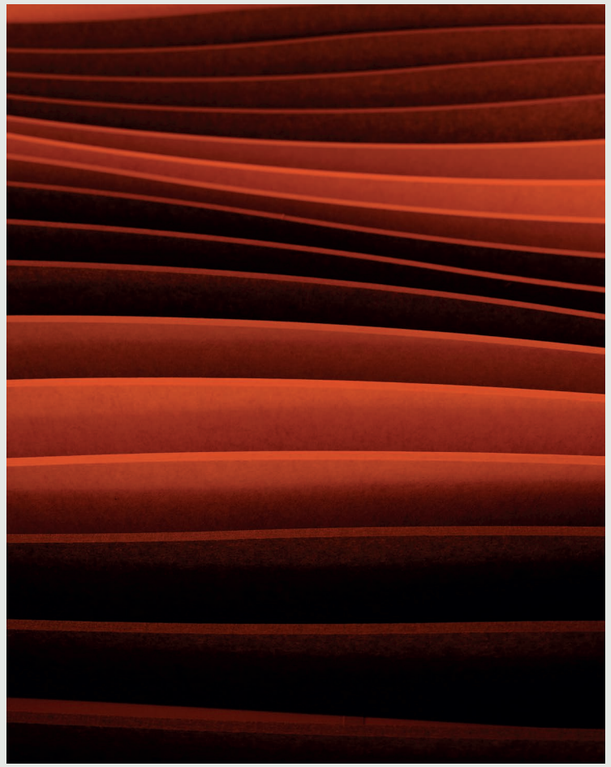

Artcoustik

Acoustics beyond imagination.

rPET through-dyed, 12 or 24 mm.
Design freedom, recycled by nature.
Customised shapes & colors.

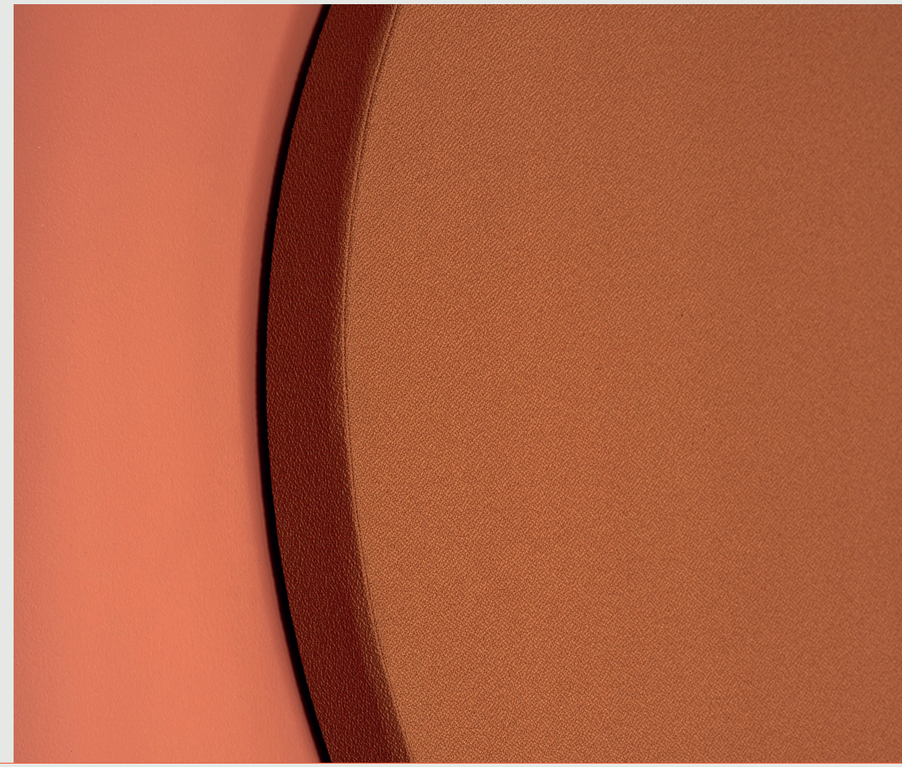

Our collections

Sound

A premium fabric finish.

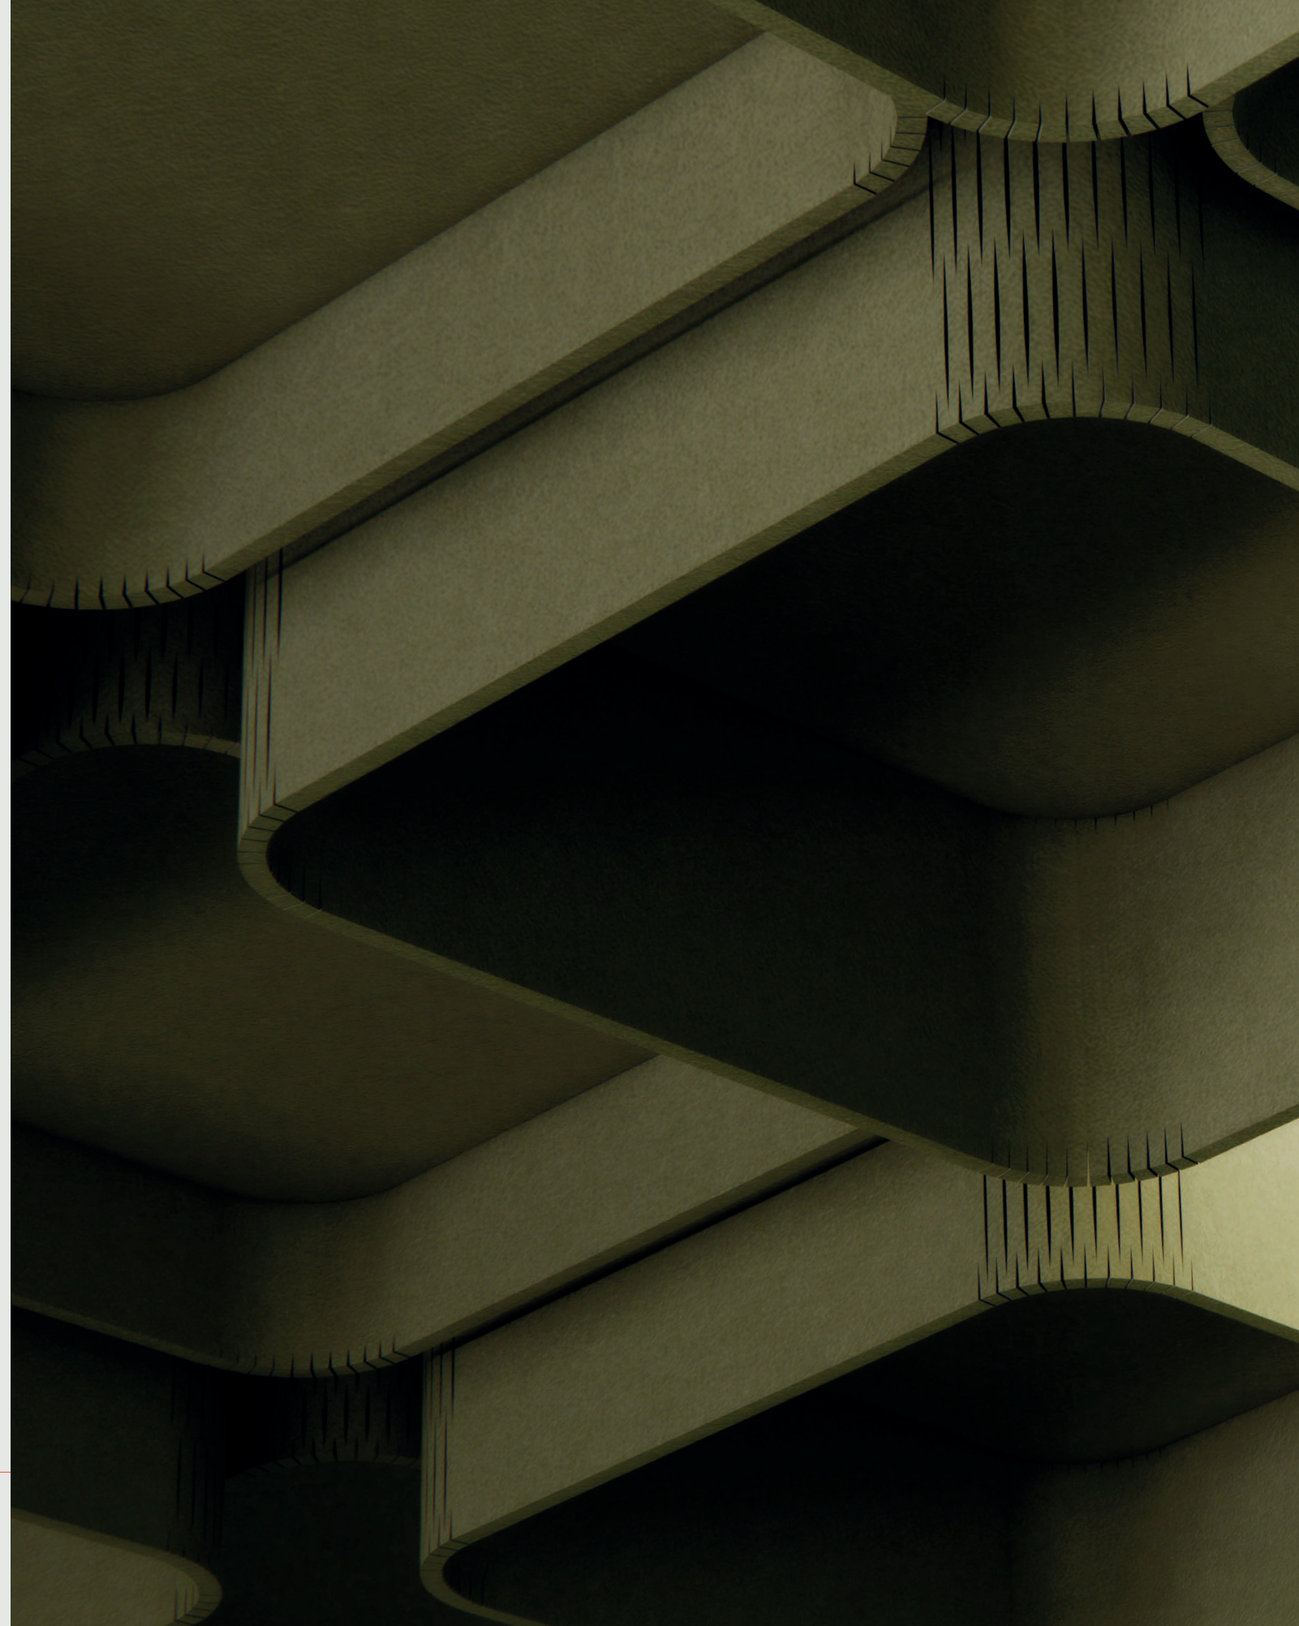

Removable covers, a wide range of textiles.
High acoustic performance.
